

MICHAEL IRYAMI

New York, NY | (516) 591-7000 | miryami@umich.edu | Github: [michaeliryami](https://github.com/michaeliryami) | Portfolio: www.michaeliryami.com

EDUCATION

University of Michigan

Ann Arbor, MI

GPA: 3.8/4.0, B.S in Computer Science

Anticipated Graduation: May 2028

Relevant Coursework: Data Structures and Algorithms, Discrete Math, Computer Science Principles, Introductory Data Structures, Computer Organization, User Interface Development

EXPERIENCE

Alias Intelligence (aliasintelligence.com)

Austin, TX

Software Engineering Intern

June 2025 – November 2025, June 2026 - August 2026

- Forward deployed a webhook-based ordering system integrated with Salesforce and Workato for a large enterprise client; processed 2,000+ orders generating \$400,000+ in revenue with improved reliability and reduced manual intervention
- Designed an asynchronous low-latency scoring pipeline using AWS Lambda, event-driven triggers, and proprietary scoring algorithms; processes 600+ investigations/week; reduced manual review time by 30 minutes per case

RallyUp (rallyup.team)

Remote

AI Engineering Intern

December 2025 - March 2026

- Built an automated evaluation system using AWS Lambda triggered by the platform's generative marketing content system; processes 100+ content items/day with structured scoring across multiple dimensions
- Created a task orchestration layer that dynamically decomposes requests into dependent steps and executes them sequentially across distributed Lambda functions for multi-step workflow execution; handles 5+ AI workflows

Buo

Remote

Lead Software Developer

December 2025 – Present

- Architected core backend services for 2 mobile applications (React Native + Node.js), supporting 3.5k+ users and handling real-time data interactions
- Led development on an AI-driven health coaching system integrating external data sources (campus dining + fitness inputs), generating adaptive plans through real-time processing of user behavior and external data inputs

PROJECTS

NextRound AI (thenextround.ai)

- Co-founded and built a real-time interview simulation platform with a queue-based scoring system, enabling asynchronous evaluation of video/audio sessions using a RAG database of 10,000+ real questions; scaled to 45+ partner organizations

Clozone AI (clozone.ai)

- Engineered a real-time conversational insurance sales simulation platform using Node.js and real-time streaming APIs (Vapi), enabling automated performance grading and feedback; reduced training time by 6+ hours/week across pilot insurance reps

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, SQL

Technologies: React, React Native, Supabase, Node.js, Next.js, Express, Git, AWS (DynamoDB, Lambda, S3), Expo, OneSignal, Serverless, Docker, Playwright, Cursor, Claude Code, Codex

INTERESTS

New York Mets | Pickleball | Settlers of Catan | Survivor | Drumming
